

Divyansh Singh

Python & AI Developer | Microservices Engineer

IIT Kanpur, Uttar Pradesh, India • +91 8439672625 • divyanshsingh843@gmail.com • github.com/DivyaanshSingh843

Python developer with production experience building asynchronous microservices, REST APIs, and AI-integrated backend systems. Comfortable working across the stack — from FastAPI and Django on the backend, to Linux server administration and CI/CD pipelines on the infrastructure side, to dataset preparation and model integration on the AI side.

CORE FOUNDATIONS

Languages: Python, Java (OOP & DSA), SQL • **CS Fundamentals:** Object-oriented design, algorithmic problem-solving, data structures for performance-critical systems

TECHNICAL SKILLS

Backend & Frameworks: FastAPI, Django, Django REST Framework, ERPNext / Frappe, REST APIs, Microservices

AI & Data Engineering: AI Dataset Preprocessing, Model Training, AI Inference API Integration

DevOps & Cloud: Azure DevOps, Azure Repos, Linux Server Administration, NGINX, Docker, CI/CD

Caching & Databases: Memcached, PostgreSQL, MariaDB / MySQL

AI Tools: Antigravity, GitHub Copilot, Claude Code, ChatGPT, OpenAI Codex

PROFESSIONAL EXPERIENCE

Python Developer — SkyAI Technologies

IIT Kanpur, UP, India (On-site) | Jan 2026 – Present

- Engineering high-performance asynchronous microservices using FastAPI, Python, and Pydantic for internal production systems.
- Creating custom AI dataset pipelines — data collection, cleaning, formatting, annotation — and training and integrating inference models into backend APIs.
- Built and shipped scalable RESTful backend services using Django and Django REST Framework.
- Customized enterprise ERP modules, DocTypes, and business approval workflows in ERPNext and Frappe Framework.
- Managing task tracking and sprint boards in Azure DevOps, pushing production code to Azure Repos, and administering Linux cloud servers with NGINX.

PERSONAL / INDEPENDENT PROJECTS

AI Model Training & FastAPI Microservice Engine github.com/DivyaanshSingh843/ai-fastapi-microservice

- Built an independent, high-throughput FastAPI microservice engine for real-time model inference powered by custom preprocessed datasets.
- Features: Pydantic request/response validation, async endpoint execution, Docker containerization.

Nexus Inventory DRF API github.com/DivyaanshSingh843/nexus-inventory-drf-api

- Developed an independent, full-featured inventory management REST API built with Django REST Framework.
- Features: JWT authentication, PostgreSQL database persistence, Memcached query caching layer.

Frappe Enterprise Procurement App github.com/DivyaanshSingh843/frappe-enterprise-procurement-app

- Built a custom procurement workflow application on the Frappe/ERPNext framework.
- Features: Automated purchase requisitions, custom DocTypes, role-based approval logic.
